Challenge Title: Secure Domain Accounts & Passwords? Probably Worth [NG]

Scenario

A couple of months ago our policy team came up with some new security policies to improve operational security at the company, you have been tasked with verifying that these policy guidelines are being enforced technically on our employee's Windows-based workstations that authenticate through the Domain Controller. If any of these new policies are not being enforced you will also be in charge of creating technical policies in form of a GPO on the Domain Controller to enforce these security policies.

Reviewed By: Solomon Zewde at Houston Community College

Duration

0:36

Full Check Pass

Full: 10/10

Final Check Details

- ✓ Check #1: DasPol GPO Created and Linked at Domain Level and Enforced [Approx. 3m Refresh]
- ✓ Check #2: Set Account Lockout Duration to Policy Defined Value [Approx. 3m Refresh]
- ✓ Check #3: Set Account Lockout Threshold to Policy Defined Value [Approx. 3m Refresh]
- ✓ Check #4: Set Maximum Password Age to Policy Defined Value [Approx. 3m Refresh]
- ✓ Check #5: Set Minimum Password Age to Policy Defined Value [Approx. 3m Refresh]
- ✓ Check #6: Set Minimum Password Length to Policy Defined Value [Approx. 3m Refresh]
- ✓ Check #7: Set Password History to Policy Defined Value [Approx. 3m Refresh]
- ✓ Check #8: Set Password Complexity Requirements to Policy Defined Value [Approx. 3m Refresh]
- ✓ Check #9: Set Stored Password Encryption Standard to Policy Defined Value [Approx. 3m Refresh]
- ✓ Check #10: Set Account Lockout Reset Counter to Policy Defined Value [Approx. 3m Refresh]

Successful troubleshooting with good documentation.

Element

Cyber IT

Work Role

System Administrator

DCWF Tasks

- 683: Maintain baseline system security according to organizational policies.

Knowledge, Skills, and Abilities

- 70: Knowledge of information technology (IT) security principles and methods (e.g., firewalls, demilitarized zones, encryption).
- 108: Knowledge of risk management processes (e.g., methods for assessing and mitigating risk).
- 113: Knowledge of server and client operating systems.
- 127: Knowledge of systems administration concepts.
- 141: Knowledge of the enterprise information technology (IT) architecture.
- 170: Skill in configuring and optimizing software.
- 209: Skill in maintaining directory services.
- 219A: Skill in operating system administration.
- 892: Skill in configuring and utilizing software-based computer protection tools (e.g., software firewalls, anti-virus software, anti-spyware).
- 986: Knowledge of organizational information technology (IT) user security policies (e.g., account creation, password rules, access control).
- 1033: Knowledge of basic system administration, network, and operating system hardening techniques.
- 1159: Knowledge of cyber threats and vulnerabilities.
