Challenge Title: Interns & HR on the Domain Controller [NG]

Scenario

Recently we concluded our first intern program here at DASWebs. While we expected it to be valuable to the intern, Rob, after working with our techs for a while on our network he brought to our attention that he could access critical systems with his basic domain credentials. After which we reviewed how things were setup we found that many domain users have access to servers and shares they shouldn't. The techs and I have already outlines the basic start to fixing these issues and we want you to handle it.

Duration

0:55

Full Check Pass

Full: 7/7

Final Check Details

- ✓ Check #1: HR Share access granted to only Sergio via HRSec security group
- ✓ Check #2: HR Share access Restricted to Domain Admins security group
- ✓ Check #3: Accounting Share access granted to only Brimlock via AccountingSec security group
- ✓ Check #4: Accounting Share access Restricted to Domain Admins security group
- ✓ Check #5: Robs Account Disabled
- ✓ Check #6: Brimlock Stones can only log onto Workstation-Desk
- ✓ Check #7: Sergio Chanel can only log onto Workstation-Desk

Cyber IT

Work Role

System Administrator

DCWF Tasks

- 695: Manage accounts, network rights, and access to systems and equipment.

Knowledge, Skills, and Abilities

- 70: Knowledge of information technology (IT) security principles and methods (e.g., firewalls, demilitarized zones, encryption).
- 108: Knowledge of risk management processes (e.g., methods for assessing and mitigating risk).
- 113: Knowledge of server and client operating systems.
- 127: Knowledge of systems administration concepts.
- 141: Knowledge of the enterprise information technology (IT) architecture.
- 167A: Skill in conducting system/server planning, management, and maintenance.
- 170: Skill in configuring and optimizing software.
- 209: Skill in maintaining directory services.
- 219A: Skill in operating system administration.
- 986: Knowledge of organizational information technology (IT) user security policies (e.g., account creation, password rules, access control).
- 1033: Knowledge of basic system administration, network, and operating system hardening techniques.
- 1158: Knowledge of cybersecurity principles.
- 1159: Knowledge of cyber threats and vulnerabilities.
