Challenge Title: Security Begins & Never Ends with Updates [NG]

Scenario

We recently did a network wide security audit and found a few things that need to be addressed as soon as possible. The domain controller, production web server, and the file share servers all have either outdated software packages critical to their function or access control misconfigurations which could lead to abuse. The engineers that did the audit will fill you in on the details.

Reviewed By: Solomon Zewde at Houston Community College

Duration

Full Check Pass

Full: 3/3

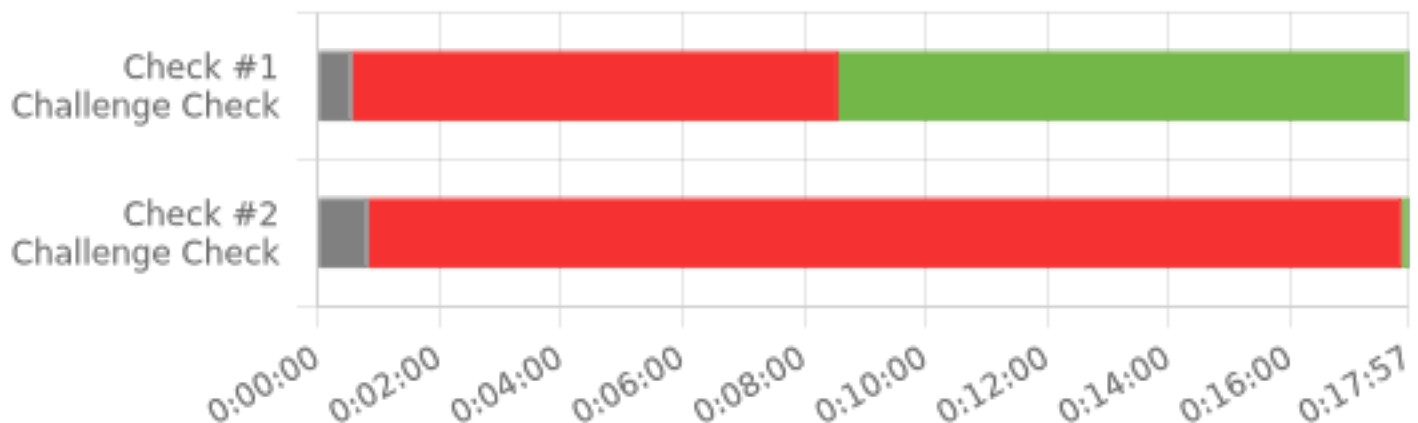

Final Check Details

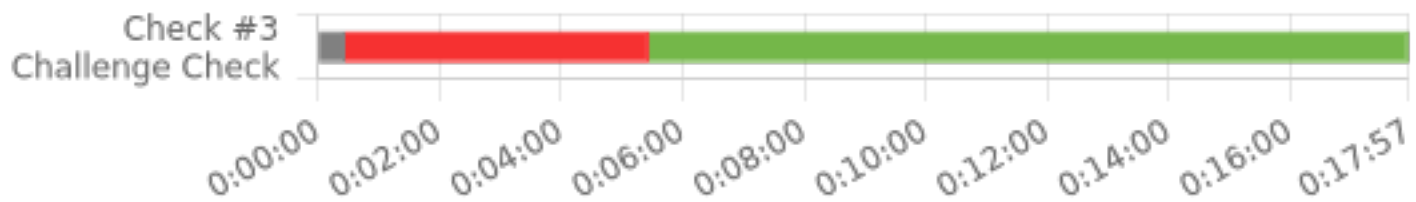

- ✓ Check #1: Guest Admin Privileges Disabled
- ✓ Check #2: Joomla Updated
- ✓ Check #3: Vulnerable FTP Updated

Curator Feedback

Successful troubleshooting with good documentation.

Challenge Attempt Successful: ✓

Element

Cyber IT

Work Role

Network Operations Specialist

DCWF Tasks

- 736: Patch network vulnerabilities to ensure information is safeguarded against outside parties.

Knowledge, Skills, and Abilities

- 55: Knowledge of cybersecurity principles used to manage risks related to the use, processing, storage, and transmission of information or data.
- 70: Knowledge of information technology (IT) security principles and methods (e.g., firewalls, demilitarized zones, encryption).
- 106: Knowledge of remote access technology concepts.
- 112: Knowledge of server administration and systems engineering theories, concepts, and methods.
- 205: Skill in implementing, maintaining, and improving established network security practices.
- 347A: Ability to execute OS command line (e.g., ipconfig, netstat, dir, nbtstat).
- 990: Knowledge of the common attack vectors on the network layer.
- 1072: Knowledge of network security architecture concepts including topology, protocols, components, and principles (e.g., application of defense-in-depth, Zero Trust).
- 1159: Knowledge of cyber threats and vulnerabilities.

Centers of Academic Excellence Knowledge Units

- Cybersecurity Foundations
- IT Systems Components
- Life-Cycle Security
- Network Defense
- Operating Systems Administration
- Operating Systems Concepts
- Operating Systems Hardening
- Operating Systems Theory
